331	3	<b>RC.</b> Good example of this Scarce/Rare plate with neat <b>752 for Stowmarket</b> . Statham est 1700 sheets which we think is too high, SG 1000, Wiggins 500, which is more accurate. Centred just a little low to left not unusual on this, few slightly trimmed perfs towards "C" sq at base, also not unusual. Missing from many specialist collections. Now Cat £2,500 which is probably still too low. RPS Certificate.							<b>£1,950</b>

Experience has shown not only are they scarce but that quite often they are NOT in perfect condition. Our prices are based on scarcity and condition.

**SG 37 Spec C8A Red Brown on White to Cream Tinter Paper. Large Crown Type I, Perf 14, Die II, Alpha 3**

**QV Volume 1 Part 1 1st Edition November 2020.** The updated version of this catalogue now recognises that this shade appeared in two separate periods. First, late worn prints from Plates 23 to 26, 28 and 30 in the Red Brown shade on White Paper are known dated from March 1856. While a second period of similar shades, dated from October 1856 appears on stronger prints. The plates involved for this period are 27, 31, 33 to 38, 40 and 42 to 46. It goes on to say "that it has not been possible from the quantities known of each plate to form a priced table for plated stamps. It is sufficient to record that these stamps on genuinely White Paper are scarce and should be purchased with a certificate stating provenance." We would add that, as a precaution, certificates from say prior to 2006, should be viewed with some caution, as bluing can be seen on some perfs on examples submitted in the past, owing to the fact that since the stamps were printed, many of them lost the bluing to some degree even to the extent of appearing to be printed on White Paper. It follows that it could be worth obtaining a more up to date opinion as this issue is far from common. Our stock of this issue is not as large as we would like. However, we do have singles, multiples and very scare covers, many of which have "modern" certificates. Enquiries welcome.

## THE SPEC C9/C9A SERIES

Whilst the update in the new "2020" Queen Victoria Specialised Catalogue has clearly outlined the differences between Blued, "Cream" and White Paper, and some of the reasons and events in early 1857 that created these, it has produced some anomalies for pricing. As usual, some are either scarcer/under catalogued, and some are perhaps more common than their catalogue value might suggest. However, more than ever before, this issue has to take into consideration the shade (and by extension), the scarcity of the shade and plate and the catalogue value of both. Bringing this into focus will help us all to understand this fascinating series, which for so long has been shrouded in "mystery". Thanks to the in-depth research undertaken by many respected philatelists, the "shroud" is lifting. We are very grateful to two of them Graham S and Winston H whose efforts on shades and plating have allowed us to offer an almost complete listing of the series. To do this properly, we have opted to include the actual shade of the stamp, as well as the two catalogue values, shade and plating, especially as these do have a bearing on the price. We intend to add notes and additional relevant information wherever and whenever we can in the future. It is for these many reasons that we have adopted a different but we hope improved layout for this section of our list.
